MOLHAM ALNAEB

Mobile Developer | Android (Kotlin & Jetpack Compose) | Flutter

Aleppo, Syria | +963 967 225 762 | molhamalnaab@gmail.com
LinkedIn: linkedin.com/in/ahmad-molham-alnaeb | GitHub: github.com/ahmadmol

PROFESSIONAL SUMMARY

Mobile Developer and Computer Engineering graduate experienced in native Android and cross-platform development with Java, Kotlin, Jetpack Compose, Flutter, and Dart. Progressed from Java to Kotlin/Compose and then Flutter, building complete applications and end-to-end features with REST APIs, Supabase, SQLite, authentication, maps, payment flows, and responsive interfaces. Currently work in an AI-assisted environment, reviewing, debugging, refactoring, and improving agent-generated code for maintainability and project alignment.

TECHNICAL SKILLS

Mobile: Kotlin, Jetpack Compose, Java, Android SDK, Flutter, Dart, Android/iOS delivery
Data & Integration: REST APIs, Supabase, authentication, SQLite, local storage, API data handling
Features & Workflow: Maps/location, payment flows, responsive UI, coding agents, AI code review, debugging, refactoring, Git/GitHub, OOP, Data Structures, Problem Solving

PROFESSIONAL EXPERIENCE

Mobile Developer - Kotlin, Jetpack Compose & Flutter

SWB Company | February 2026 - Present

- Built complete Android applications with Kotlin and Jetpack Compose during the first four and a half months of employment.
- Developed end-to-end features covering UI, business logic, API integration, data handling, validation, and error states.
- Integrated REST APIs and transformed backend responses into functional, user-focused application features.
- Transitioned to Flutter and Dart; now build cross-platform Android/iOS features and connect screens to backend APIs.
- Use coding agents to accelerate implementation while reviewing, debugging, refactoring, and improving generated code; own features from requirements through integration and validation.

DEVELOPMENT EXPERIENCE

Freelance and Academic Mobile Developer

2022 - Present

- Started with Java/native Android, then progressed to Kotlin and Jetpack Compose before expanding into Flutter and Dart.
- Built and supported applications and graduation projects for quizzes/exams, product marketing, real estate, and horse auctions.
- Implemented REST APIs, Supabase, SQLite, authentication, maps/location, payment flows, debugging, technical guidance, and reusable UI components.

SELECTED PROJECTS

Smart Assistant for Visually Impaired Users - Graduation Project | Flutter, Dart, AI Integration, Local Server
Built an accessible Flutter application for navigation and object awareness; integrated an AI recognition library and local processing server, and connected recognition services to clear user guidance.

Android Applications Portfolio | Java, Kotlin, Jetpack Compose, REST APIs, SQLite
Built complete Android screens and features for quizzes, listings, marketing, and auctions, including API integration, authentication, local storage, maps, location features, and reusable components.

Flutter Applications Portfolio | Flutter, Dart, REST APIs, Supabase
Developed responsive cross-platform features, connected applications to backend APIs, and applied native Android experience to application structure and interface development.

EDUCATION, LANGUAGES & AVAILABILITY

Bachelor's Degree in Computer Engineering
Aleppo University | 2019 - 2025
Arabic - Native | English - Intermediate

Open to relocation across Saudi Arabia, the United Arab Emirates, and other GCC countries. Available for on-site, hybrid, and remote mobile development opportunities.
